E-Wallet

Mercurius Travel

Integrated services

Crew Management Services

Crew Management

2,000 specialists – the right seafarers in the right places.
High levels of retention ensures reliability and continuity

Highly experienced team providing industry best practice solutions to a diverse spread of vessel types

Representation on industry committees concerning crewing and training standards

Able to offer full crew management or hybrid partial crewing solutions

Seafarer Welfare

Our aim to ensure the wellbeing of our seafarers is achieved through the following initiatives:

Company KPIs linked to on-time reliefs

Anonymous whistleblowing tool gives seafarers a 'voice'

Mental health resources available to all

Mercurius Travel Ltd

Mercurius Travel sources the best travel solutions at the most competitive prices

We care for your travellers as if they were our own, to ensure a safe journey on time, every time and we provide the travel expertise needed to solve your problems and provide peace of mind in an unpredictable world

Learning and Development

Our in-house training team deliver the group training strategy utilising their own resources to develop bespoke training courses, whilst also partnering with industry leading training providers

Career Development System (mentoring and training)

Apprentice Officer / Cadet programmes

Industry decarbonisation targets (in-house training courses)

SIRE 2.0 (gap analysis and training needs addressed)

Managing careers

Career management framework designed around the seafarer - their role, their ambition and their preferences

Enabling seafarers to develop bespoke training and development plans to enrich their careers with us

Managing contracts and time

Ability to manage contracts, calendars, availability and forthcoming deployments

Visibility of up-and-coming contracts and rotations via a single digital interface

Managing finance

Ability to review wages, overtime and cash advances remotely and at a time that suits them

Giving seafarers greater choice and control over how they send money back home to their families

E-wallet available to allow complete digital control of funds

Managing mobilisations

Remote document upload allowing seafarers greater ability to manage documentation at their own convenience

All uploads are secure and auto-verified for greater confidence and tracking

Integrated services

Procurement Services

Through the Group's procurement company ProFleet, you will achieve cost efficiencies as our global processes provide economies of scale that no single owner could achieve.

We are able to use the buying power of a combined fleet to get the lowest prices for common items of stores and spares.

ProFleet has negotiated favorable pricing on:

- Marine lubricants
- Sea store paints
- Technical stores
- Machinery spares
- Satellite communication
- Drydocking and repairs
- Hull cleaning and diving services
- Logistics and freight forwarding

Integrated services

Navigation & Communication

Digital Ocean Technologies (DOT) is an entity of professionals with extensive experience in the related maritime industry. It works closely with the ship management division in providing worldwide 24/7 services and support in the field of Navigation and Communication equipment.

- ✓ A company that works side by side with its ship management division
- ✓ Consists of qualified and trained personnel
- ✓ 24/7 remote troubleshooting and support
- ✓ Worldwide support through a service network
- ✓ Annual, periodical and renewal radio class inspections as required by SOLAS regulations
- ✓ Annual VDR/S-VDR inspections; Authorisation from VDR/S-VDR manufacturers to carry out the annual performance tests
- ✓ Gyro maintenance and inspections; Service centre for several brands of gyrocompass and navigation systems
- ✓ Maintenance inspections; vibration analysis and thermal inspections

Integrated services

Capability platforms

INTERORIENT
SHIPMANAGEMENT

MARITIME  REDEFINED

Optimising vessel performance

One of the most advanced ship management platforms in the industry

Real-time operational visibility gives you control and enables you to manage safety, compliance and performance

Financial transparency

Transparent reporting and data sharing gives you greater control over costs

Easy to view dashboards make it easy to monitor financial performance

Procurement control

View procurement information through the buying cycle from shelf to ship

Procurement data is fully integrated with all other Nautilus Client Portal modules

Managing crew

Our Crew Management platform manages the whole seafarer employee life cycle, from recruitment through career development and off-boarding

The client portal allows you to view your pool and see which crew are working where and when

Nautilus Client Portal provides transparency and control

- One of the marine industry's only full management platform
- Providing a complete real time solution to marine operations
- All in the palm of your hand

Benefits to the following stakeholders:

- The Owner, Technical Manager, Commercial Manager, Financial Controller and HSEQ
- The shore-based fleet team, Technical, Crewing, HSEQ, Procurement

Reducing costs and improving efficiencies

- Our teams will get to know you and your vessels
- We will work with you to find tailored solutions that optimise your assets, improve performance and reduce running costs
- Through safe, efficient operations we will keep your vessels at sea, avoiding detention costs
- You will get the best balance of cost-effectiveness and quality of service
- Our pricing is competitive through partnerships and ongoing benchmarking

We will help you:

- **Operate safely and compliantly**
- **Optimise vessel performance**
- **Reduce running costs**
- **Innovate and improve**
- **Assist in fleet life cycle**
- **Provide technical expertise**
